BEATRIZ COLOMINA

(Princeton University)

Architectural historian and theorist, long-term visiting professor at DAD.

MARK WIGLEY

(Columbia University)

Architectural historian and theorist.

How is architecture related to disease and suffering bodies? Can architecture act as a form of prevention and cure?

Drawing on historical case studies from Modern Architecture, this course will explore the long-lasting bond between architecture, illness and care. We will mobilise historical knowledge to harness a variety of contemporary design and urban settings with health-inducing or health-harming effects.

Sala Mollino

— Castello del Valentino
Viale Mattioli, 39 - 10125 Torino

A unique opportunity to critically explore the intersection of architecture, illness, and care, together with two of the most influential contemporary architectural theorists.

Politecnico di Torino

Dipartimento di Architettura e Design

The invisible Cities Lab
